Hi Karen:

Here's another public comment.

Subject: ground-water

contamination in Evergreen Manor

I live just west of the contaminated area in Tresemer Estates. I was not able to attend the meeting that was held on Aug. 19th, however, I have some concerns.

I don't feel that enough attention has been given to the area of Tresemer Estates concerning contamination in our area. There have been a number of people in our neighborhood that have suffered from cancer, and I can't help but wonder if the water we have been drinking and bathing in could be the cause.

I would be very much interested in knowing just what sort of effects the TCE and PCE cause. I also don't feel that this should be allowed to just go away naturally, when it is going to take another 15 years to clean up. This is something that is a health hazard and needs to be cleaned up as quickly as possible to prevent any further health hazards to the people and animals that live in this area. I believe that quickest method should be used to get this cleaned up and the responsible parties should have to take care of the cost involved to get this done.

Thank you for your attention to this matter.

Sincerely,

Dana Butts
Homeowner
